Table of contents, volume 185, 1991

Number 1

P.J. Meikle, I. Bonig, N.J. Hoogenraad, A.E. Clarke, B.A. Stone: The location of (1→3)-β-glucans in the walls of pollen tubes of *Nicotiana alata* using a (1→3)-β-glucan-specific monoclonal antibody 1

C.N. McDaniel, R.W. King, L.T. Evans: Floral determination and in-vitro floral differentiation in isolated shoot apices of *Lolium temulentum* L. 9

S. Ball, T. Marianne, L. Dirick, M. Fresnoy, B. Dèlrue, A. Decq: A *Chlamydomonas reinhardtii* low-starch mutant is defective for 3-phosphoglycerate activation and orthophosphate inhibition of ADP-glucose pyrophosphorylase 17

S.R. Hurst, D.L. Kropf: Ionic requirements for establishment of an embryonic axis in *Pelvetia* zygotes 27

T. Björkman, R.E. Cleland: Root growth regulation and gravitropism in maize roots does not require the epidermis 34

J.G. Dong, W.T. Kim, W.K. Yip, G.A. Thompson, L. Li, A.B. Bennett, S.F. Yang: Cloning of a cDNA encoding 1-aminocyclopropane-1-carboxylate synthase and expression of its mRNA in ripening apple fruit 38

E.N. Elpidina, N.E. Voskoboynikova, M.A. Belozersky, Y.E. Dunaevsky: Localization of a metalloproteinase and its inhibitor in the protein bodies of buckwheat seeds 46

Le Van Quy, T. Lamaze, M.-L. Champigny: Short-term effects of nitrate on sucrose synthesis in wheat leaves 53

P. Meuwly, P.-E. Pilet: Local treatment with indole-3-acetic acid induces differential growth responses in *Zea mays* L. roots 58

A. Nebenführ, A. Schäfer, P. Galland, H. Senger, R. Hertel: Riboflavin-binding sites associated with flagella of *Euglena:* A candidate for blue-light photoreceptor? 65

R.D. Hall, M.M. Yeoman: The influence of intracellular pools of phenylalanine derivatives upon the synthesis of capsaicin by immobilized cell cultures of the chilli pepper, *Capsicum frutescens* 72

P. Geigenberger, M. Stitt: A "futile" cycle of sucrose synthesis and degradation is involved in regulating partitioning between sucrose, starch and respiration in cotyledons of germinating *Ricinus communis* L. seedlings when phloem transport is inhibited 81

L.M. Hill, A.M. Smith: Evidence that glucose 6-phosphate is imported as the substrate for starch synthesis by the plastids of developing pea embryos 91

T. Markgraf, R. Oelmüller: Evidence that carotenoids are required for the accumulation of a functional photosystem II, but not photosystem I in the cotyledons of mustard seedlings 97

S.P. Mayfield: Over-expression of the oxygen-evolving enhancer 1 protein and its consequences on photosystem II accumulation 105

J. Knoetzel, D. Simpson: Expression and organisation of antenna proteins in the light- and temperature-sensitive barley mutant *chlorina-^{104}* 111

W. Hares, M. Frentzen: Substrate specificities of the membrane-bound and partially purified microsomal acyl-CoA:1-acylglycerol-3-phosphate acyltransferase from etiolated shoots of *Pisum sativum* (L.) 124

Erratum 131

Number 2

L.F. Hernández, A. Havelange, G. Bernier, P.B. Green: Growth behavior of single epidermal cells during flower formation: Sequential scanning electron micrographs provide kinematic patterns for *Anagallis* 139

T.D. McKnight, D.R. Bergey, R.J. Burnett, C.L. Nessler: Expression of enzymatically active and correctly targeted strictosidine synthase in transgenic tobacco plants 148

D. Volkmann, B. Buchen, Z. Hejnowicz, M. Tewinkel, A. Sievers: Oriented movement of statoliths studied in a reduced gravitational field during parabolic flights of rockets 153

A.C. McCormac, J.R. Cherry, H.P. Hershey, R.D. Vierstra, H. Smith: Photoresponses of transgenic tobacco plants expressing an oat phytochrome gene 162

J. Marc, W.P. Hackett: Gibberellin-induced reorganization of spatial relationships of emerging leaf primordia at the shoot apical meristem in *Hedera helix* L. 171

A.M.C. Wolters-Arts, M.M.A. Sassen: Deposition and reorientation of cellulose microfibrils in elongating cells of *Petunia* stylar tissue 179

T. Hogetsu: Mechanism for formation of the secondary wall thickening in tracheary elements: Microtubules and microfibrils of tracheary elements of *Pisum sativum* L. and *Commelina communis* L. and the effects of amiprophosmethyl 190

K. Torii, S. Satoh, T. Fujii: Immunohistochemical localization of a glycoprotein, GP80, in the outermost layer of the developing endosperm of immature seeds of carrot 201

B. André, G.F.E. Scherer: Stimulation by auxin of phospholipase A in membrane vesicles from an auxin-sensitive tissue is mediated by an auxin receptor 209

R.A.J. Hodgson, J.K. Raison: Lipid peroxidation and superoxide dismutase activity in relation to photoinhibition induced by chilling in moderate light 215

M. Tacke, Y. Yang, M. Steup: Multiplicity of soluble glucan-synthase activity in spinach leaves: Enzyme pattern and intracellular location 220

V. Santoni, G. Vansuyt, M. Rossignol: The changing sensitivity to auxin of the plasma-membrane H^+-ATPase: Relationship between plant development and ATPase content of membranes 227

K. Matzke, M. Riederer: A comparative study into the chemical constitution of cutins and suberins from *Picea abies* [L.] Karst., *Quercus robur* L., and *Fagus sylvatica* L. 233

W. Fink, M. Haug, H. Deising, K. Mendgen: Early defence responses of cowpea (*Vigna sinensis* L.) induced by non-pathogenic rust fungi 246

G. Cornic, J. Ghashghaie: Effect of temperature on net CO_2 assimilation and photosystem II quantum yield of electron transfer of French bean (*Phaseolus vulgaris* L.) leaves during drought stress 255

H.P. Getz: Sucrose transport in tonoplast vesicles of redbeet roots is linked to ATP hydrolysis 261

J.L. Karmoker, D.T. Clarkson, L.R. Saker, J.M. Rooney, J.V. Purves: Sulphate deprivation depresses the transport of nitrogen to the xylem and the hydraulic conductivity of barley (*Hordeum vulgare* L.) roots 269

P.K. Farage, S.P. Long: The occurrence of photoinhibition in an over-wintering crop of oil-seed rape (*Brassica napus* L.) and its correlation with changes in crop growth 279

Number 3

T.D. Sharkey, T.L. Vassey, P.J. Vanderveer, R.D. Vierstra: Carbon metabolism enzymes and photosynthesis in transgenic tobacco (*Nicotiana tabacum* L.) having excess phytochrome 287

N. Rascio, P. Mariani, E. Tommasini, M. Bodner, W. Larcher: Photosynthetic strategies in leaves and stems of *Egeria densa* 297

J.R. Gorst, P.C.L. John, F.J. Sek: Levels of $p34^{cdc2}$-like protein in dividing, differentiating and dedifferentiating cells of carrot 304

M. Kluge, D. Mollenhauer, R. Mollenhauer: Photosynthetic carbon assimilation in *Geosiphon pyriforme* (Kützing) F. v. Wettstein, an endosymbiotic association of fungus and cyanobacterium 311

E. Falkenstein, B. Groth, A. Mithöfer, E.W. Weiler: Methyljasmonate and α-linolenic acid are potent inducers of tendril coiling 316

M.J. Hawkesford, A.R. Belcher: Differential protein synthesis in response to sulphate and phosphate deprivation: Identification of possible components of plasma-membrane transport systems in cultured tomato roots 323

S. Knudsen, M. Müller: Transformation of the developing barley endosperm by particle bombardment 330

K. Siebke, A. Laisk, S. Neimanis, U. Heber: Regulation of chloroplast metabolism in leaves: Evidence that NADP-dependent glyceraldehydephosphate dehydrogenase, but not ferredoxin-NADP reductase, controls electron flow to phosphoglycerate in the dark-light transition 337

A. Wilimowska-Pelc, M. Dryjański, T. Żal, T. Wilusz: Metalloproteinase from the seedlings of kale (*Brassica oleracea* L. var. *sabellica*): Preparation, partial characterization and substrate specificity 344

K.D. Grasser, A. Wurz, G. Feix: Isolation and characterization of high-mobility-group proteins from maize 350

R.-G. Zhen, H.-W. Koyro, R.A. Leigh, A.D. Tomos, A.J. Miller: Compartmental nitrate concentrations in barley root cells measured with nitrate-selective microelectrodes and by single-cell sap sampling 356

H.M. El-Shora, T. ap Rees: Intracellular location of $NADP^+$-linked malic enzyme in C_3 plants 362

E. Melzer, M.H. O'Leary: Aspartic-acid synthesis in C_3 plants 368

F.M. Cánovas, F.R. Cantón, F. Gallardo, A. García-Gutiérrez, A. de Vicente: Accumulation of glutamine synthetase during early development of maritime pine (*Pinus pinaster*) seedlings 372

T. Björkman, R.E. Cleland: The role of extracellular free-calcium gradients in gravitropic signalling in maize roots 379

R.J. Robins, E.G. Bent, M.J.C. Rhodes: Studies on the biosynthesis of tropane alkaloids by *Datura stramonium* L. transformed root cultures. 3. The relationship between morphological integrity and alkaloid biosynthesis 385

J. Sánchez-Bravo, A. Ortuño, J.M. Botia, M. Acosta, F. Sabater: Lateral diffusion of polarly transported indoleacetic acid and its role in the growth of *Lupinus albus* L. hypocotyls 391

S. Veljović-Jovanović, Z.G. Cerović: Induction of oscillations in chlorophyll fluorescence by re-illumination of intact isolated pea chloroplasts 397

N. Shah, J.W. Bradbeer: The development of the activity of the chloroplastic and cytosolic isoenzymes of phosphoglycerate kinase during barley leaf ontogenesis 401

A. Rikin: Temperature-induced phase shifting of circadian rhythms in cotton seedlings as related to variations in chilling resistance 407

P. Nick, E. Schäfer: Induction of transverse polarity by blue light: An all-or-none response 415

M.B. Wilkins: The role of the epidermis in the generation of the circadian rhythm of carbon dioxide fixation in leaves of *Bryophyllum fedtschenkoi* 425

J. van Berkel, J. Conrads-Strauch, M. Steup: Glucan-phosphorylase forms in cotyledons of *Pisum sativum* L.: Localization, developmental change, in-vitro translation, and processing 432

T. Weiser, W. Blum, F.-W. Bentrup: Calmodulin regulates the Ca^{2+}-dependent slow-vacuolar ion channel in the tonoplast of *Chenopodium rubrum* suspension cells 440

N.A. Walker, D. Sanders: Sodium-coupled solute transport in charophyte algae: A general mechanism for transport energization in plant cells? 443

Number 4

J.W. La Claire II, R. Fulginiti: Dynamics of microtubule reassembly and reorganization in the coenocytic green alga *Ernodesmis verticillata* (Kützing) Børgesen 447

J.M. Villalba, M. Lützelschwab, R. Serrano: Immunocytolocalization of plasma-membrane H^+-ATPase in maize coleoptiles and enclosed leaves 458

M.S. Bret-Harte, T.I. Baskin, P.B. Green: Auxin stimulates both deposition and breakdown of material in the pea outer epidermal cell wall, as measured interferometrically 462

J.P. Hill, R.L. Malmberg: Rates of corolla growth in tobacco determined with the plastochron index 472

U. Holthaus, K. Schmitz: Distribution and immunolocalization of stachyose synthase in *Cucumis melo* L. 479

M. Talon, F.R. Tadeo, J.A.D. Zeevaart: Cellular changes induced by exogenous and endogenous gibberellins in shoot tips of the long-day plant *Silene armeria* 487

M. Weiss, U. Pick: Uptake of the fluorescent indicator atebrin into acidic vacuoles in the halotolerant alga *Dunaliella salina* 494

P.B. Green, A. Havelange, G. Bernier: Floral morphogenesis in *Anagallis:* Scanning-electron-micrograph sequences from individual growing meristems before, during, and after the transition to flowering 502

J.S. Gebhardt, C.N. McDaniel: Flowering response of day-neutral and short-day cultivars of *Nicotiana tabacum*. Interactions among roots, genotype, leaf ontogenic position and growth conditions 513

C.J. Ferguson, S.C. Huber, P.H. Hong, S.R. Singer: Determination for inflorescence development is a stable state, separable from determination for flower development in *Pisum sativum* L. buds 518

Chi-Cheng Chang, D.R. Schmidt: Initiation and proliferation of carrot callus using a combination of antibiotics 523

A. Hager, G. Debus, H.-G. Edel, H. Stransky, R. Serrano: Auxin induces exocytosis and the rapid synthesis of a high-turnover pool of plasma-membrane H^+-ATPase 527

C. Pillonel, M.M. Mulder, J.J. Boon, B. Forster, A. Binder: Involvement of cinnamyl-alcohol dehydrogenase in the control of lignin formation in *Sorghum bicolor* L. Moench 538

W. Oberhuber, H. Bauer: Photoinhibition of photosynthesis under natural conditions in ivy (*Hedera helix* L.) growing in an understory of deciduous trees 545

A. Laisk, K. Siebke, U. Gerst, H. Eichelmann, V. Oja, U. Heber: Oscillations in photosynthesis are initiated and supported by imbalances in the supply of ATP and NADPH to the Calvin cycle 554

P. Geigenberger, M. Stitt: Regulation of carbon partitioning between sucrose and nitrogen assimilation in cotyledons of germinating *Ricinus communis* L. seedlings 563

M. Thume, K.-J. Dietz: Reconstitution of the tonoplast amino-acid carrier into liposomes. Evidence for an ATP-regulated carrier in different species 569

D.R. Rank, R.W. Breidenbach, A.J. Fontana, L.D. Hansen, R.S. Criddle: Time-temperature responses of tomato cells during high- and low-temperature inactivation 576

V.A. Smith, V.M. Sponsel, C. Knatt, P. Gaskin, J. MacMillan: Immunochromatographic purification of gibberellins from vegetative tissues of *Cucumis sativus* L.: Separation and identification of 13-hydroxy and 13-deoxy gibberellins 583
